

Downstream Operations

RHL's Energy division specialises in staffing solutions for Refinery & Oil Fuel Storage and distribution operations throughout the UK. We are currently providing recruitment services to several high profile clients in this area. Our field of expertise includes new build engineering projects, commercial and ongoing operations and maintenance of plant and equipment.

We offer a full portfolio of recruitment services in order to source contract, interim and permanent individuals as well as offering bespoke services such as Executive Search, Contract Management, Payroll Services and Recruitment Advertising.

RHL partner with each client and build long term relationships to ensure we understand and meet their needs. Our approach is adaptable, since no two clients are the same. This flexibility allows us to adjust to the ever evolving business realities faced by our clients.

Because our consultants specialise in specific areas we know the market in depth and are connected to the people currently employed in these sectors. Through engagement with both passive and active candidates we are able to provide our clients with shortlists of qualified and competent people.

Supported by a number of offices we are able to provide local, national and global campaigns.

Roles we recruit for include:

- **Engineering & Design**
- **Project Management**
- **Construction Management**
- **Operations & Maintenance**
- **QHSE**
- **Commercial**
